分野別展示第２弾　電気情報・物理工学・材料科学

BOOK EXHIBITION
11 NOVEMBER 2026

THE NEWS 7 TIMES ★★★

Period : 2026/11/2(Mon)~11/24(Thu)
Place : 1F Main Hall

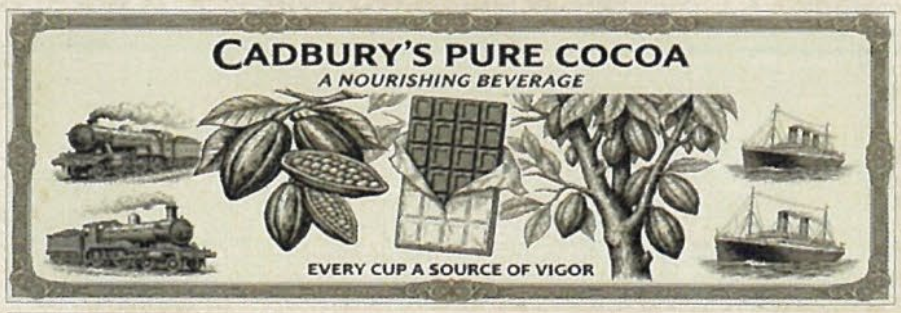

＊貸出回数7回の本

NEXT BREAKOUT BOOKS

BREAKING NEWS : THE"7-BORROW" PHENOMENON

These 17 books are far more than mere statistics—they represent a non-stop intellectual relay on our shelves. Every title featured in this special exhibition was published in or after 2024. In the fast-moving worlds of engineering and physical sciences, standard academic loans run for weeks, making a total of seven borrows not just a casual figure, but the physical maximum allowed by time itself. The moment these volumes hit the return counter, another eager hand reaches out to claim them. Passed seamlessly like a baton among students and researchers on the frontline, these are the essential breakout tech books driving today's innovations-from generative AI to advanced materials science. Grab this cutting-edge knowledge before the paper wears thin and the next reader takes the lead!

"The Road to 100 Checkouts."

Seven borrows is merely the starting line. For the 17 trailblazing volumes published since 2024, the journey toward legendary status has only just begun. As next-generation researchers and engineers pick them up in a continuous relay of knowledge, these books are marching steadily down the long road to 100 checkouts. Will you be the next to add your mark to their borrowing history? Claim your place in the legacy of innovation.
